Hilton Head Marriott Resort & Spa

One Hotel Circle, Hilton Head Island, SC 29928; Phone: 843-686-8487

Program Directors

Chandra P. Belani, MD

Hershey, PA

Statement of Need/Program Overview

This symposium is intended to provide comprehensive updates on biology, diagnosis, screening, and management of cancer. New strategies in the treatment options of cancer and their clinical applications will be provided. This program will facilitate interaction among oncologists, and researchers interested in development of novel therapeutics for cancer. In addition to multimodality therapy, adjuvant therapy, and targeted therapies, this symposium will present data on pharmacogenomics, and the role of individualized therapy of most promising emerging agents currently in development for the treatment of cancer. The format will include didactic lectures from known thought leaders, question and answer sessions, and ample opportunity for participant interaction with faculty. In-depth discussion of several chemotherapeutic agents at various stages of clinical development for multiple malignancies that target signaling pathways will also be given significant focus. Emerging data from ongoing clinical research will be presented.

Target Audience:

This symposium is directed primarily to medical oncologists, radiation oncologists, surgical oncologists, researchers, pharmacists, registered nurses, and physician assistants interested in new developments for treatment of various malignancies. No specific skill or knowledge other than a basic training in oncology is required for successful participation in this activity. Fellows are also invited to attend.
